

Safer Trailers Smarter Towing

Real-time tire monitoring that gives drivers confidence and Trailer OEMs a competitive edge.

Increase Brand Value

Add a premium safety feature that customers will pay more for

Reduce Warranty Costs

Prevent uneven tire wear, roadside breakdowns, and warranty claims

Gain a Market Advantage

Stay ahead of the competition with an innovative solution to safe towing

The Next Generation TPMS

Designed for OEMs

Our Bluetooth TPMS solution was developed with the OE trailer manufacturer in mind, delivering an easy-to-install solution.

Set your product apart from the competition by giving your customers greater towing confidence with real-time tire pressure alerts displayed directly on their tow vehicle's dashboard.

Instant Warnings For:

- ▶ Slow or rapid tire pressure loss
- ▶ Sudden temperature increases caused by brake drag, overload, or bearing failure
- ▶ Improperly inflated tires

How it Works

1

Factory Install

Sensor-Valves are factory-installed on the tire rim at the tire & wheel OEM.

2

Connect

Tire pressure data is sent in real-time to any cellphone to a free customer-friendly app.

3

Display

Safely drive hands-free while monitoring your trailer's tire data on your infotainment display.

Available for download on Apple App Store and Google Play

Features:

Real-time alerts right to your towing vehicle's dash

Valve and sensor in one package replacing the need to purchase a separate tire valve

Extend tire life with proper tire pressure confirmation every time you start your vehicle

Battery life designed to last the life of the tire

Engineered with the OEM in mind for high-volume production line installation

Detects brake drag, bearing failure, and tire overloading through advanced tire temperature monitoring

Ideal Solution For:

Towable RVs

Cargo and Utility Trailers

Livestock Trailers

Recreational and Boat Trailers

Heavy Equipment Trailers

Let's build Safer Trailers Together.
